

ProximaHub Features

Complete feature list for ProximaHub attendance management software.

Device Management

- Auto-discover ZKTeco devices on your network
- One-click device registration
- Remote restart, power off, clock sync and unlock
- Scheduled automatic backups with restore
- Multi-device support from a single hub
- Device health monitoring and status

Attendance Tracking

- Real-time punch recording from all connected devices
- Live punch feed dashboard
- Automatic late-in and early-leave detection
- Configurable grace periods per-minute
- Overtime tracking and threshold alerts
- Holiday work detection and pay rate multipliers
- Multiple shift schedules with break configuration

Leave Management

- Multiple leave types: sick, casual, annual, unpaid, half-day
- Configurable entitlements per employee per year
- Leave balance tracking and visibility
- Leave approval workflow
- Integrated with attendance calculations

Reports and Export

- Bank-ready salary estimate reports
- Attendance summary and grid reports
- Timesheet generation with version history
- Export to PDF, Excel (XLSX) and CSV

- Re-download any previously generated report
- Deductions, overtime and holiday pay factored in

Security and Access

- Role-based operator accounts (admin, manager)
- Security PIN for sensitive operations
- Offline recovery codes for account access
- Audit trail of all configuration changes
- Machine-bound license with cryptographic signing

Platform

- Runs on Windows and Linux
- Fully offline after initial license activation
- No cloud dependency for daily operations
- Background service with low resource usage
- Web-based dashboard accessible from any browser on your network
- Works with ZKTeco K60, U160, F22, iClock and similar terminals

Pricing

- Per-user pricing, not per-device
- Starter: Rs 60/user/month (min Rs 3,000)
- Professional: Rs 100/user/month (min Rs 5,000)
- Enterprise: Rs 150/user/month (min Rs 10,000)
- 14-day free trial with 2 devices and 10 users
- Annual plans save 2 months
